Encounter Date: 9/11/2023

Specialty: Cardiothoracic Surgery

Please review recent MyChart communication for details.

New hives/rash associated with timing of eliquis administration. Transitioning to warfarin therapy INR range 2-3, goal 2.5, due to prosthetic leaflet thrombosis. Will remain on anticoagulation for minimum of 6 mos post inferior STEMI (~04/2024) with adjunctive plavix 75 mg qd.

Continue eliquis 5 mg BID until starting on warfarin. Referral to anticoag entered today.
